

TAKING THE MYSTERY OUT OF PROTECTING YOUR OFFICE 365 DATA

Microsoft Office 365 lets you work anywhere, anytime with both on-premises and cloud SaaS, IaaS and PaaS-based solutions.

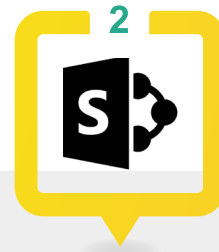

CONSIDER THIS: More than 56% of businesses rely on Office 365¹, using over 350 million seats².

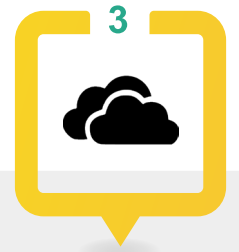

THE TOP APPS USED:

Exchange

SharePoint Online

OneDrive for Business

But while Microsoft takes care of the infrastructure for these services, **it's up to you to take care of your data.**

DID YOU KNOW:

Items in Office 365 are retained for only **90 DAYS** in the recycle bin

Any items deleted from the recycle bin are **AUTOMATICALLY REMOVED AFTER 90 DAYS**

You can only restore a deleted mailbox in Office 365 **WITHIN 30 DAYS**

Emails can be modified and deleted by users and admins, **INCREASING COMPLIANCE RISKS**

Offsite backup and point-in-time recovery are **NOT SUPPORTED**

92% of Office 365 commercial subscribers do not use third-party backup³, often inadvertently putting the business at risk of massive data loss and regulatory fines.

CLOUD-TO-CLOUD DATA PROTECTION

is the missing piece to keeping your Office 365 data safe

Arcserve Cloud Backup for Office 365 gives you:

- Total protection for Exchange Online, OneDrive for Business and SharePoint Online with fully integrated backup and cybersecurity
- Granular recovery and rapid restore back to Office 365
- A unified management console and role-based access control
- Policy-based management
- SLA reporting
- Straightforward, subscription-based licensing with egress included

Protect your Office 365 data and preserve business operations. [Learn more.](#)
