

ARCSERVE PRODUCTS

HELPING BUSINESSES PROTECT WHAT'S PRICELESS

Established in 1983, Arcserve has redefined the way companies protect their data, bringing decades of innovation and countless hours of iteration to the solutions they rely on to keep their businesses running smoothly. Arcserve's roots in innovation run deep, going far beyond backup-as-usual to protect the time, money and productivity of users by removing the cost and complexity of modern IT.

ARCSERVE UNIFIED DATA PROTECTION

Reliable, all-in-one disaster recovery and backup for cloud, virtual and physical workloads.

Arcserve Unified Data Protection (UDP) combines enterprise-ready technologies into an all-in-one solution that delivers every disaster recovery and backup capability businesses demand, without the complexity of traditional enterprise solutions. Powered by heterogeneous, image-based technology that protects to and from any target, it eliminates the need for discrete products.

ARCSERVE APPLIANCES SECURED BY SOPHOS

First and last line of defense against cyber-attacks, IT disasters and data loss.

The Arcserve 9000 Appliance Series is the first and only means to neutralize ransomware attacks, deliver effective disaster recovery (DR) and restore data - an all-in-one data protection strategy that can be deployed in just 15 minutes flat.

Powered by award-winning Arcserve Unified Data Protection (UDP) and Sophos Intercept X cybersecurity, Arcserve Appliances uniquely combine deep learning endpoint protection with onsite and offsite business continuity capabilities for a multilayered approach that delivers complete IT resiliency, scaling from 12TB to 504TB to meet the business needs of any organization.

ARCSERVE CONTINUOUS AVAILABILITY

Continuous data protection to ensure vital mission-critical systems and applications remain operational.

Arcserve Continuous Availability ensures business continuity for applications and systems with proven technologies that have one common purpose: to keep the business up and running, and operational. Confidently deliver on the most stringent SLAs with asynchronous technologies that eliminate the need for discrete replication programs focused on specific applications and systems.

Arcserve Continuous Availability synchronizes the data on Windows and Linux systems with a second physical or virtual system provisioned locally, at a remote location, or in the cloud. Once synchronized, byte-level changes are continuously replicated from the production system to the replica system, providing constant protection to keep data and information accurate, and systems operational.

ARCSERVE BACKUP

Battle-tested backup to tape devices from 60+ vendors, as well as to disk and cloud storage.

Arcserve Backup is a comprehensive storage management solution designed with unique technologies that improve the economies of data protection and backup by enabling longer retention periods, reducing storage, and integrating powerful deduplication into existing backup environments.

Its highly-scalable three-tier architecture, central database and distributed member servers let IT teams manage very large environments with ease, maintaining full control and visibility from one management console - whether protecting small- or large-scale enterprise environments running Windows, Linux, Solaris, AIX, HP-UX and FreeBSD platforms and Oracle Databases, SAP R/3, SAP HANA, Informix, Sybase, Lotus/Domino, Microsoft SQL Server, SharePoint and Exchange applications.

 **ARCSERVE LIVE MIGRATION**

Migrate data, applications and workloads to the cloud (or other destinations) without downtime

Arcserve Live Migration simplifies the process of migrating data, applications and workloads to the cloud or other target destinations of your choice. In addition to real-time replication which ensures your source and target are in sync before the migration, Arcserve Live Migration will orchestrate the cutover to the target destination to take the complexity out of the migration.

 **ARCSERVE BUSINESS CONTINUITY CLOUD**

A single, cloud-hosted solution to meet RTOs, RPOs, and SLAs without the complexity of multiple tools, vendors and interfaces.

Arcserve Business Continuity Cloud untangles the knot of 21st Century IT by delivering powerful backup, disaster recovery, high availability, and email archiving technologies through a single cloud-native management interface.

Businesses are armed with complete protection for their entire IT ecosystem, eliminating downtime and data loss in any location, from their applications and systems, at their premises and in their clouds.

 **ARCSERVE UDP CLOUD HYBRID**

Cloud-based backup, disaster recovery and long-term retention for hybrid IT infrastructures.

Many businesses are adopting hybrid cloud solutions for improved agility and lower costs, yet quickly realize their infrastructures have just become more complex. Offered as a service extension to Arcserve UDP software and appliances, Arcserve UDP Cloud Hybrid meets modern IT requirements with a single solution for cloud backup, offsite disaster recovery and long-term retention.

 **ARCSERVE UDP CLOUD DIRECT**

Cloud-native backup and disaster recovery as a service (BaaS/DRaaS) for hardware-free, near-zero data loss.

Arcserve UDP Cloud Direct is a robust direct-to-cloud backup and disaster recovery service offering designed to seamlessly protect large and distributed IT environments, and remote offices without requiring local hardware or management. With industry-leading backup times and RTOs/RPOs of minutes, IT teams keep businesses running smoothly during an outage.

 **ARCSERVE UDP ARCHIVING**

Purpose-built email archiving solution for regulatory compliance, available as a software or fully managed SaaS.

Arcserve UDP Archiving is a purpose-built email archiving solution that makes it easy to comply with stringent legal and regulatory requirements, delivering robust capabilities on- and offsite, as well as across multiple tenants and languages. Businesses eliminate the cost and hassle of traditional archiving solutions and leverage robust capabilities not found in native solutions, including Office 365, at a lower cost.

Available as a traditional software and a fully managed SaaS-based solution, IT teams optimize storage and increase performance with flexible options of storing archived email in a location independent from their primary mail system. And, with available capacity-based licensing, businesses dramatically reduce costs by protecting unlimited mailboxes and only paying for the storage they use.

ABOUT ARCSERVE

Arcserve provides exceptional solutions to protect the priceless digital assets of organizations in need of full scale, comprehensive data protection. Established in 1983, Arcserve is the world's most experienced provider of business continuity solutions that safeguard multi-generational IT infrastructures with applications and systems in any location, on premises and in the cloud. Organizations in over 150 countries around the world rely on Arcserve's highly efficient, integrated technologies and expertise to eliminate the risk of data loss and extended downtime while reducing the cost and complexity of backing up and restoring data by up to 50 percent.
